

Bakaloo WhatsApp templates

Ready-to-use message designs for orders, abandoned carts, offers and festivals. Each page shows how the message looks on the customer's phone, when it is sent, and where its picture comes from.

5 Utility (order updates)

5 Marketing (offers, reminders)

Pictures chosen for every message

How a picture works. Meta approves the template once, with a sample picture. After that, every message gets the real picture: the customer's own cart product, a product that is on offer, or one of your festival banners. A new festival never needs a new template.

Utility templates — updates about something the customer did

welcome_how_can_we_help

Utility

When: First message to a customer whose 24-hour window is closed, or after sign-up.

Hi **Rahul**, this is Bakaloo, your neighbourhood grocery delivery. We are here to help with your orders, delivery or anything else. Just reply to this message and our team will assist you.

Bakaloo – fresh groceries, fast delivery

How to use these

1. Create it

Templates → New template. Type the name, choose Utility or Marketing, add the picture slot (Header → Image / banner) and a sample picture, then paste the message and add the buttons.

2. Submit to Meta

Press "Save and submit to Meta". Utility is usually approved in minutes. Marketing can take longer. Press Sync with Meta to refresh the status.

3. Pick the picture

In Workflows or Campaigns choose "Which picture should we send?": the customer's cart product, a product on offer, products you choose, or your own banners.

4. Switch it on

Cart reminders: Workflows → Cart left behind. Offers and festivals: Campaigns → pick who gets it. Marketing only goes to customers who opted in.

Remember: keep the names exactly as shown, add a Stop offers button to every marketing template, and use only photos that follow WhatsApp's commerce policy (no alcohol, tobacco, weapons or adult content).
